

A7180 – Pools

Fiscal Year 2021-22  
Vehicles and Equipment

Chemtrol Digital Controller

---

This is a replacement Chemtrol unit needed for the Alteri Pool. Previous units from both Alteri and Flynn were sent in for repairs. Based on their condition it was recommended that a new unit be purchased. This Chemtrol unit controls and monitors the amount of chemicals in the water.

The base bid for the Alteri Pool includes disassembly of usable parts and equipment from the Flynn Pool for installation at the Alteri Pool, which includes removal and relocation of the filter system from the Flynn Pool for use in its restoration.

Replacement of 20' of corroded pipe, valves, skimmer system, sealant at deck/pool interface, and electrical components; installing chemical controller and main drain covers supplied by the City, and testing the existing leveling system. Alternate number 2 includes furnishing and installing a new filter system at the Alteri Pool.
